Q3 Retrospective

Product and Engineering • actions and owners

What worked

Weekly scope reviews reduced late surprises.
Design handoffs started earlier in the cycle.

What to change

Too many handoffs late in the quarter.
Analytics requests lacked a single intake path.
Incident follow-ups need a visible owner.

Actions

Create a single intake form	Elena
Move design review to week two	Nora
Add incident owner to weekly metrics	Daniel

Revisit at the start of Q4.
